SmartDCP Kit

Laser Dynamic Cone Penetrometer

The SmartDCP is easy to operate by a single person. This kit provides data recording to the synchronized device via the app. More accurate test results are achieved in less time compared to the traditional method.

This innovative product reduces the working time and manpower required to collect soil behavior data, while improving accuracy and simplifying field logistics. This is achieved using a mobile device app and Bluetooth laser to count each blow automatically. Total depth is tracked using the data transfer and desktop application, which organizes and plots the information, eliminating the need for ruler, pen and paper.

The smart phone app is free and available from the iOS and Google Play app store. The combination of software and hardware converts handheld DCP equipment into an automated smart DCP that will provide you better field results at a huge cost savings.

1

BLUETOOTH LASER PENETROMETER AND APP

8

KILOGRAM HAMMER WITH GUIDE BAR

2

24" EXTENSION STAINLESS STEEL BARS

5

HARDENED REUSABLE CONE TIPS

Laser Dynamic Cone Penetrometer

WHAT'S IN THE KIT

- » Vertek software and laser range finder
- » Base plate with laser mount
- » Laser target plate
- » Smart device arm band
- » Set of wrenches
- » 1 stainless steel 30" bar
- » 2 stainless steel 24" extension bars
- » 8 kilogram hammer with guide bar and handle
- » 5 hardened reusable cone tips
- » 1 scale of 40" with connections for laser-less measurement
- » Manual, CD, carry bag & hard case with wheels
